

MSCA-Postdoctoral Fellowship writing up workshop

June, 27th 2024, 10:00-12:00 (On-line) Madrid time

The training program of the University of Alcalá aims to strengthen the knowledge of our researchers about the European R&D&I public funding environment and provide them with the necessary tools to obtain competitive resources and facilitate the attraction of talent.

This training programme, funded by the COOPERATE4EU project (Ref.: GPE2023-001215-P), is aimed at contributing to the institutional and professional development of those scientific-technical profiles that have knowledge and previous experience in the topics to be discussed, or manage activities related to research, development and innovation.

This workshop given by Euro-Funding aims to provide UAH research groups with the best tools to prepare successful MSCA-PFs proposals.

With the MSCA-PF project writing up workshop we want to present the main keys to writing successful projects in the Marie Skłodowska-Curie program, particularly the PostDoctoral Fellowship, breaking down the different sections of each proposal (excellence, impact, implementation and annexes). The workshop will end with a first evaluation by Euro-Funding consultants of proposals underway or planned by UAH researchers.
